Ya not getting shafted with inflationary tokens as a boost and not more of your underlying asset....

1) yes, anything Hoyas. 2) Wasnt Europe and Canada supposed to come online? How are the competitors able to be in every country but Voyager?

Why not add a stop loss to your exchange? How hard can it be to code it in? Come on

Hey so I just wanted to inform everyone .
Me and my buddy had used VOYAGER when we first started trading crypto . Long story short , they Made 400\$-500\$ worth of ADA (CARDANO) disappear back in September , still have NOT received a reply back from customer service . My buddy sent me last week Polygon (Matic) last week(10days ago) and I still have not received it (750Matic) . I checked the address 10x , even had other ppl double check the address and it's correct . There's nothing wrong on either end. Support ticket still not answered .
WANTED TO GIVE A WARNING . To everyone and anyone . Please share and get the word out so people don't get screwed like myself ! If anyone thinks they can help , feel free to share on Twitter and Reddit .
Support ticket #400547
